

"Horses and riding are my passion, and I've read a lot of books about riding, but none affected me as much and as deeply as *Riding from the Heart* by Ian Stevenson.

"It is more than a book about horses, riding, and horsemanship. It reflects the whole fascination of our relationship with horses, based on a deep soul connection to these wonderful animals, written with a nice sense of humor.

"It describes how it is possible to connect in an easy, essential way with these energy creatures, how to communicate with them at a natural understanding level of a horse, whether in groundwork or riding position.

"This book is a must for all horse people who love and want to understand horses from the bottom of their hearts. But you will not be the same person when you have finished reading this book." —Annette Ruffing

"Horses live amazing lives, secret with incredible instincts. They're telepathic..." —Dick Francis
